What is Fire Science?

The Fire Science major at John Jay College of Criminal Justice prepares students for a fire service or fire protection career by providing an overall understanding of the scope, content and literature of fire science, and by developing key skills necessary for bringing about fire safety in the public and private sectors. Public sector career opportunities include working directly in federal, state, and local fire organizations. Private sector career opportunities include working with architects in building code consulting, fire protection systems design (such as design of sprinkler and alarm systems) and other related areas.
