Criminal Justice
The Criminal Justice major provides the opportunity to study many facets of the criminal justice system, from courtrooms to policing to juvenile justice. It prepares students for a career in law enforcement, judicial, or correctional agencies and lays the groundwork for graduate study. This program is offered at the following CUNY community colleges:

- Borough of Manhattan Community College
- Bronx Community College
- Hostos Community College
- Kingsborough Community College
- LaGuardia Community College
- Queensborough Community College

Successful completion of this program leads to automatic admission into John Jay’s B.S. in Criminal Justice Institutional Theory and Practice program.

Forensic Science
The major in Forensic Science provides academic and professional training for work in forensic science laboratories as a research scientist, teacher, or medical professional. At the associate degree level (years 1 and 2), the course work is strongly focused on basic foundations in chemistry, biology, physics, and calculus-level mathematics. This program is offered at the following CUNY community colleges:

- Borough of Manhattan Community College
- Bronx Community College
- Hostos Community College
- Kingsborough Community College
- Queensborough Community College

Successful completion of this program results in automatic admission into John Jay’s B.S. in Forensic Science program.

Forensic Financial Analysis
The major in Forensic Financial Analysis combines course work in accounting and economics with training in the tools and techniques used to detect and prevent fraud. The first half of the program leads to an A.S. in Forensic Accounting. This program is offered at the following CUNY community colleges:

- Borough of Manhattan Community College
- Hostos Community College

Successful completion of this program leads to automatic admission into John Jay’s B.S. in Economics program with a specialization in Forensic Financial Analysis.
